

E-Commerce Executive Dashboard

Reporting window Sep 2025 – Aug 2026 (last 12 complete months) · completed orders only · all regions, categories and payment methods

Revenue

₹2.22 Cr

▼ 0.5% vs prior 12 mo

Average Order Value

₹11,514

▲ 2.3% vs prior 12 mo

Customer Acquisition Cost*

₹3,669

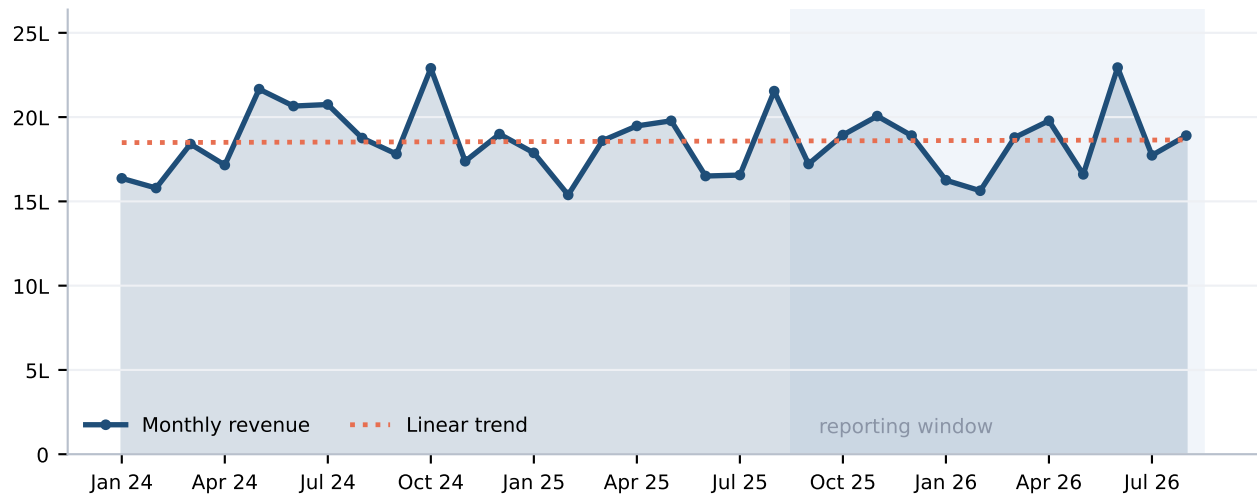

▲ 82.7% vs prior 12 mo

Monthly Churn Rate

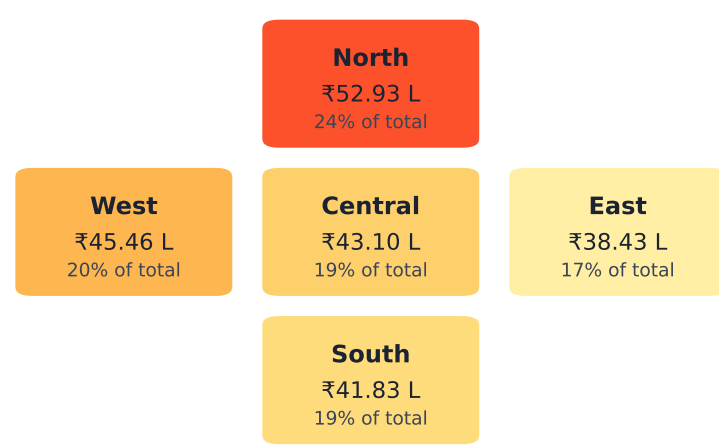

29.9%

▼ 0.8 pp vs prior 12 mo

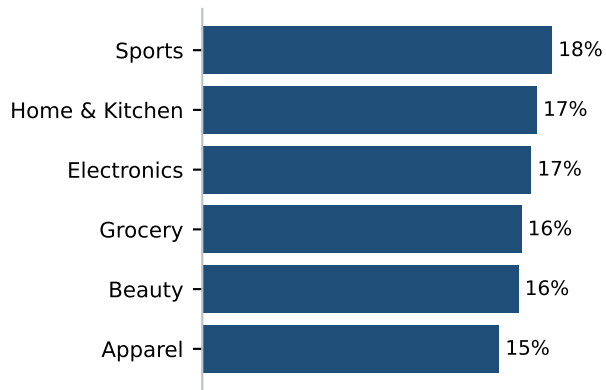

Monthly revenue with linear trend (₹, L = lakh)

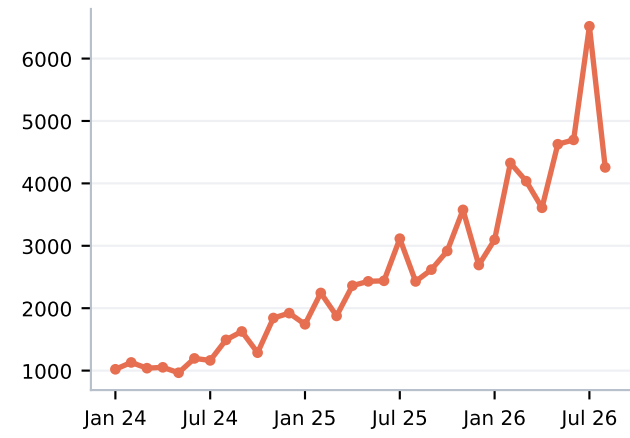

Revenue by region (heat tiles, schematic layout)

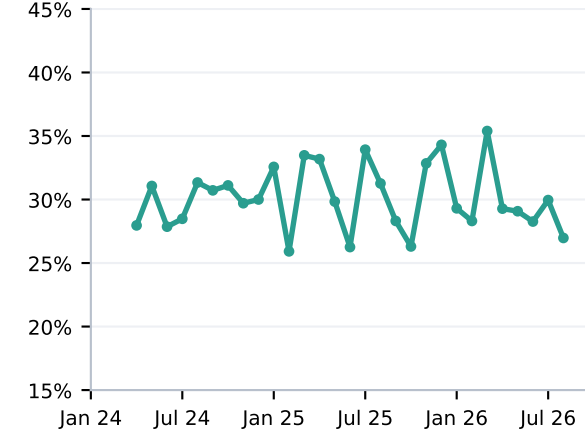

Revenue by category

CAC by month (₹, illustrative spend)

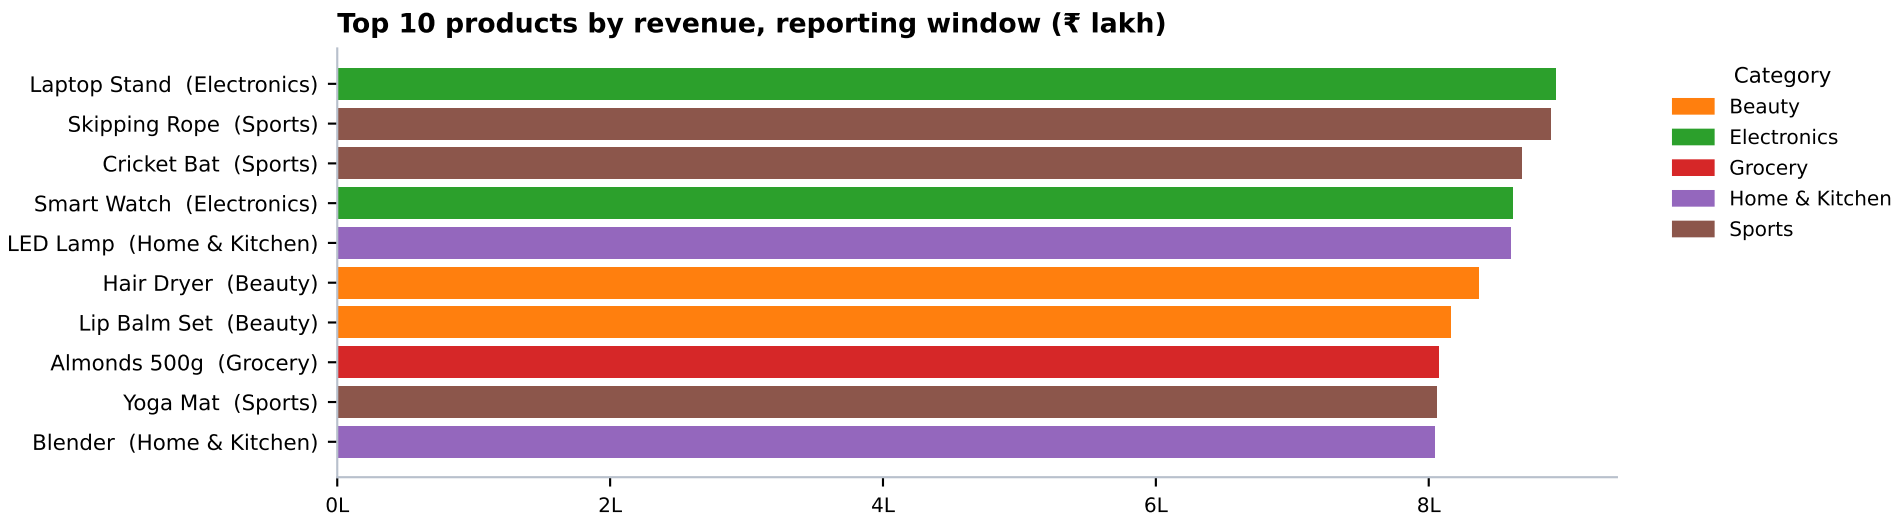

Monthly churn rate

*CAC uses an illustrative marketing-spend assumption (the source data has no marketing costs). CAC trend reflects a shrinking new-customer pool in this dataset. Churn = customers active in the trailing 90 days who lapse within the month.

Drill-down & methodology

Categorical drill-down (category → product) and quarterly KPI history. The live Streamlit app adds year→ quarter → month drill-down and slicers.

Quarterly KPI history

Quarter	Revenue	Orders	AOV	New customers	CAC*	Churn
2024 Q1	₹50.56 L	461	₹10,968	425	₹1,062	n/a
2024 Q2	₹59.47 L	519	₹11,459	420	₹1,066	29.0%
2024 Q3	₹57.31 L	502	₹11,417	321	₹1,410	30.2%
2024 Q4	₹59.27 L	530	₹11,183	294	₹1,647	30.3%
2025 Q1	₹51.87 L	464	₹11,178	222	₹1,933	30.7%
2025 Q2	₹55.76 L	492	₹11,334	194	₹2,410	29.7%
2025 Q3	₹55.32 L	509	₹10,869	170	₹2,688	31.2%
2025 Q4	₹57.90 L	494	₹11,721	158	₹3,035	31.1%
2026 Q1	₹50.68 L	439	₹11,543	113	₹3,764	30.9%
2026 Q2	₹59.32 L	495	₹11,984	109	₹4,237	28.9%
2026 Q3 (2 mo)	₹36.63 L	331	₹11,068	57	₹5,168	28.5%

Definitions: Revenue = $\sum \text{quantity} \times \text{unit price} \times (1 - \text{discount})$ on Completed orders · AOV = revenue ÷ completed orders · CAC = allocated marketing spend ÷ new customers (first completed order) · Churn = share of customers active in the trailing 90 days at month start with no order in the trailing 90 days at month end.
Assumptions & limits: marketing spend is illustrative (data/marketing_spend_monthly.csv); geography is region-level (5 regions); 24 rows with margin below -100% (cleaning artifacts) are excluded; the partial latest month (Sep 2026) is excluded; churn is not computable for the first 3 months of data (so 2024 Q1 shows n/a); periods with fewer than a full quarter of months are labelled, e.g. 2026 Q3 (2 mo).
